EXPERIENCE

- **Full-Stack Developer Intern- ModelSuite.ai** Feb 2026 – Apr 2026
Certificate Remote
 - Built a **GitHub integration** — webhook receiver for push events on main/master, CI/CD failure detection that auto-closes PRs with a comment, and a real-time bell pushing PR opened/closed/merged events to all admins via **Socket.IO**.
 - Built full-stack features on a live **multi-tenant SaaS platform** (React, Node.js, Express, MongoDB) — timezone-aware activity reporting, inline admin approve/reject workflows, and a company-scoped global settings system with upsert-based config propagation.
 - Fixed a production **MongoDB aggregation crash** and resolved **12,000+ ESLint errors** across the codebase, improving overall code quality and stability.
 - Integrated **Cursor and Claude Code** into daily dev workflow to accelerate feature development; resolved critical senior-flagged PR issues same-day — a build-breaking syntax error, null validation bug, and modal state sync issue.

 - Designed secure backend with **JWT, HTTP-only cookies, RBAC** and scalable **REST APIs** using Node.js, Express, and MongoDB.
 - Built a responsive UI using **React, Redux Toolkit, Tailwind CSS, Framer Motion** with file uploads via Multer.
- **SmartDocAI** Jul 2024 – Oct 2024
Freelance AI Assistant Project / Streamlit, Whisper, Python, EasyOCR, LLM APIs
